

SUCCESS

WHAT DOES SUCCESS LOOK LIKE IN SOUTH CAROLINA?

Success means different things to each of us. Our interpretation and vision of success are different - they are unique and personal. At MEBA, we believe success is happiness and having passion for what you choose to do for a career and the positive contributions you make in your daily life. We believe there are many pathways to success, and that no one pathway is the right one. If you understand who you are, what you like to do or don't want to do, know your strengths and weaknesses, MEBA believes in your success!

There are students eager to begin a career and enter the workforce full time upon high school graduation. Some of these students interested in specific careers will earn industry certifications and training while in high school that will allow them to enter a career of their choice once they graduate from high school. There are other students who may attend a two year or four year college or university, while others may choose to pursue training and education through our military. ALL of these pathways will lead you to prosperity and success!
