

BE A PART OF THE AUTOMOTIVE INDUSTRY

The Automotive Industry is included in the following two majors of the Transportation, Distribution and Logistics career cluster:

- Transportation, Distribution & Logistics Cluster
- Automotive Industry

“I’ve worked in many different industries, but the one I’ve enjoyed the most is the automotive industry. I enjoy the hands-on experience, the challenge of trouble-shooting and the constant change in technology. That’s why I decided to pursue a career in the automotive industry.”

— Student / Midlands Technical College

Now, more than ever, careers in the automotive industry provide invaluable opportunities to individuals, which in turn critically benefit the economy of our State. With over 34,000 jobs attributable to Franchised New Vehicle Dealerships in South Carolina, in a multitude of departments such as Management, Sales, Service, and Finance, the automotive industry is diverse, booming, stable and open to a range of skillsets. SCADA urges and invites you to consider the journey of an automotive career!”

— E. Sims Floyd, Jr. / Executive Vice President, SCADA

Automotive Industry in South Carolina

Research that promises to be on the leading edge of transportation change has a home in South Carolina. That includes Clemson University’s International Center for Automotive Research (ICAR) and its first-ever doctoral program in automotive engineering. Research in fuel-cell work is ongoing at the University of South Carolina.
